LEGAL TECH AND AI CONSULTING

Your engineering partner for a unified, AI-powered legal stack

We help law firms and legal tech companies choose, build, and adopt the right technology and AI, from concept to production.

LEGAL TECH SINCE 2008

Ari Hershowitz

CEO, Galexic

J.D., Georgetown Law · M.S., Caltech · Member of the California Bar

Attorney and software engineer. Founded Tabulaw in 2008, a tool for lawyers to search case law and drop cited quotes straight into their briefs.

- Congressional Innovation Consultant (2012–2024): drafting and publishing systems for the U.S. House and GPO
- Inventor of a patented document comparison system for legislative texts
- Developer of the bill similarity algorithm behind Related Bills on Congress.gov
- Co-author of the *Guidelines for AI in Parliaments*

WHAT WE BUILD

Legal Tech and AI Consulting

Estimates, prototypes on your own documents, and production-ready AI, aligned with your business goals.

Data Connectors

Secure pipelines connecting dockets, transcripts, contracts, and other legal documents into the systems your team already uses.

Legal Tech Ops

Custom APIs, AI agents, and workflows that connect your legal department's systems and remove manual handoffs.

CASE STUDY

Legislative summarization at volume

A custom AI pipeline turns hearing transcripts into agenda-item summaries in each client's required format. The backlog cleared, and coverage no longer depends on headcount.

> *"Working with Galexic and their exceptional team has been a game-changer for us. The results exceeded our expectations."*
>
> **Michael Segal, President and CEO**

Let's build the future of legal tech together

A joint US and Ukrainian engineering team, formerly DreamProIT. Ari maps the workflow and specifies what to build; Galexic's engineers deliver it.
